SITUATION SUMMARY

2017 Statewide January Winter Storms

Cal OES Coastal Region

- Cal OES Coastal Region is monitoring activity throughout the region.

Proclamations

- See Proclamation Slide.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Lake County: Clear Lake at Lakeport
- Solano County: Sacramento River at Rio Vista

Please see link for River Forecast Guidance - <http://www.cnrfc.noaa.gov/>

Cal OES Inland Region

- Cal OES Inland Region is monitoring activity throughout the region.
 - Operational Areas (OAs) are conducting their damage assessments and completing Initial Damage Estimates.

Deployments

- 1 Emergency Services Coordinator (ESC) is deployed to San Joaquin County.

Proclamations

- A Corrected Ratified Signed Resolution was received from San Joaquin County for the January 2017 Storms.
- A Proclamation Ratification Resolution was received from Amador County for the 2017 Winter Storms.
- See Proclamation Slide.

Missions

- **2017-Inland-29867:** CCC crew to Yolo County to assist RD2035 with levee flood fight. **Mission Closed.**

SITUATION SUMMARY

2017 Statewide January Winter Storms

Cal OES Inland Region (Continued)

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Tehama County: Sacramento River at Tehama Bridge
- Plumas County: Middle Fork of the Feather River at Portola
- Glenn County: Sacramento River at Ord Ferry
- Colusa County: Sacramento River at Colusa Weir; Sacramento River at Colusa Bridge
- Sutter County: Sacramento River at Tisdale Weir; Sacramento River at Fremont Weir
- Yolo County: Yolo Bypass at Lisbon
- Sacramento County: Cosumnes River at Michigan Bar; Mokelumne River at Benson's Ferry
- Stanislaus County: Tuolumne River at Modesto; San Joaquin River at Newman
- Merced County: Merced River at Stevinson

Please see link for River Forecast Guidance - <http://www.cnrfc.noaa.gov/>

Cal OES Southern Region

Proclamations

- A Ratified Proclamation and CDAA letter was received from the City of Chula Vista due to the January 2017 Storms.
- A Proclamation from Inyo County has been received requesting Director of the Governor's Office of Emergency Services concur in this declaration of a local emergency; any and all assistance including CDAA.
- A Proclamation of Local Emergency was received from San Diego County. The County requested available Federal and State Assistance, to include CDAA.
- See Proclamation Slide.

Missions

- 2017-Southern-29938 – Boulder removal Inyo County. Mission on-going.

Proclamations have been received from the following counties, cities, tribal governments, and special districts as a result of the 2017 Statewide January Winter Storms:

Proclamations for Coastal Region:

- Counties: Alameda County, Contra Costa County, Humboldt County, Lake County, Marin County, Mendocino County, Monterey County, Napa County, San Benito County, Santa Clara County, Santa Cruz County, Solano County, Sonoma County
- Cities: City of Benicia, City of Gilroy, City of Martinez, City of Oakland, City of Orinda, City of Point Arena
- Tribes: Hoopa Valley Indian Reservation

Proclamations for Inland Region:

- Counties: Alpine County, Amador County, Butte County, Calaveras County, El Dorado County, Kern County, Lassen County, Merced County, Nevada County, Placer County, Plumas County, Sacramento County, San Joaquin County, Shasta County, Sierra County, Siskiyou County, Sutter County, Trinity County, Tuolumne County, Yolo County, Yuba County
- Cities: City of Grass Valley, City of Nevada City, City of Placerville, City of Portola, City of South Lake Tahoe, Town of Truckee
- Special Districts: Reclamation District 900, Washington Water District

Proclamations for Southern Region:

- Counties: [Inyo County](#), Los Angeles County, Mono County, Riverside County, [San Diego County](#), San Luis Obispo County, Santa Barbara County, San Bernardino County
- Cities: City of Duarte, City of Diamond Bar, City of Chula Vista, City of National City, City of Poway, City of Pismo Beach, Town of Mammoth Lakes

SITUATION SUMMARY

California Department of Public Health Influenza Update

- California continues to see higher than expected levels of hospitalization for influenza or influenza-like illness (ILI). While influenza activity varies from year to year and is unpredictable, California generally sees an increase in cases in late December or early January and it often peaks in February or March. The Hemagglutinin 3 and Neuraminidase 2 (H3N2) strain appears to be the predominant strain so far this influenza season and this strain is contained in the current influenza vaccine.
- The Medical and Health Coordination Center (MHCC) continues to remain activated in response to the increase in ILI and medical surge occurring throughout California. The MHCC will distribute a Public Health and Medical (Emergency Function 8) Situation Report related to influenza on Wednesday of every week until conditions improve and stabilize.
- The MHCC has received two local situation reports from Amador and Stanislaus Counties. There are no resource requests or significant impacts requiring state assistance at this time.
- Please see attached for full report.

WEATHER OF CONCERN

Weather of Concern

- A wet pattern returns to northern California as a series of weather systems line up over the Pacific. Moderate rain, snow and occasional gusty winds are expected over the next several days.
 - 8 to 12 inches of snow above 6,000 feet from Kings Canyon National Park north to Yosemite National Park.
 - Areas south of Kings Canyon National Park above 6,000 feet can expect 2 to 4 inches of snow.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

Key Points

02/02 – 02/08

Thursday-Friday

- Snow will impact travel over the Sierra and mountains of northern CA
- Gusty winds will impact travel and may caused downed tree branches and localized power outages over portions of northern and central CA
- Localized flooding possible due to heavy rain across central and northern CA

Saturday

- No significant weather impacts expected

Sunday-Tuesday

- Snow will impact travel over the Sierra and mountains of northern CA

Wednesday

- No significant weather impacts expected

	High Threat
	Moderate Threat
	Slight Threat
	No Discernible Threat

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

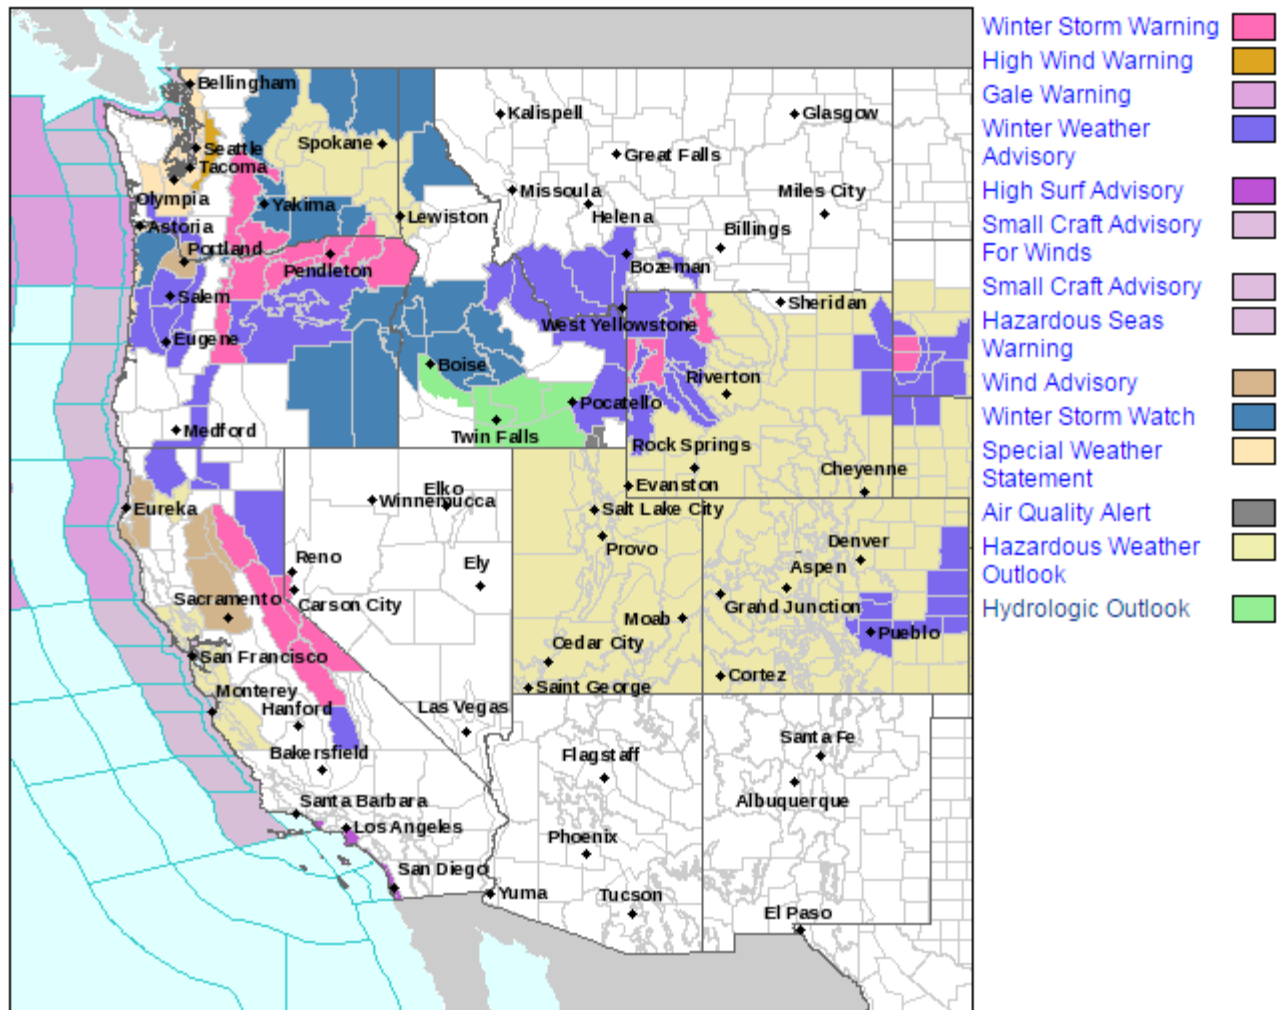

A Pacific low pressure system is just offshore, and over the next couple days it will move northeastward to the Washington coast. Multiple waves of precipitation will swing across Northern California with gusty SE-SW surface winds between now and early Saturday. Gusts will reach 40-45 mph in the most wind-prone high elevation areas today, and 25-35 mph elsewhere in open areas. Peak gusts on Friday will be 40-50 mph in many locations. Snow levels will be near 4000 feet in the far north and 6000 feet at the south end of the region. The heaviest precipitation through early Saturday will be over the higher terrain west of the Cascade-Sierra crest, where 3-6 inches of rainfall equivalent is possible. Areas east of the crest will only see light amounts, generally less than an inch. Lower elevations west of the crest will receive 1-3 inches of rainfall in the north and 0.50-1.50 inches in the south. By midday Saturday the precipitation will change over to occasional showers in the mountains and isolated showers in valleys, with more breaks in the clouds. However, another system will move in Sunday night with similar snow levels, and it will continue until early Tuesday, with snow levels dropping to 2500-4000 feet on Monday. In general, Northern California will be in a pattern where a Pacific storm system will move in every 2-3 days through mid February, continuing the wet unsettled and occasionally windy conditions.

SOUTHERN CALIFORNIA

A Pacific storm off the Northern California Coast will bring showers to Central California through Friday night. Most foothill and mountain locations across Central California will receive between 1 and 4 inches of rainfall and most coastal and valley locations will receive between a quarter inch and an inch of rainfall with this storm. Scattered showers will occur across Southern California Friday morning through Friday night with less than a quarter inch of rainfall. South to west winds of 15 to 30 mph with gusts to 50 mph will surface across the mountain ridges and desert passes through Friday night. A weak ridge of high pressure will bring a break in the wet weather Saturday. Another storm will form off the Northern California Coast Sunday bringing showers to Central California starting Sunday afternoon and Monday morning to Southern California. Showers with this second storm will continue through Tuesday evening. Rainfall amounts will be very similar to the first storm. South to west winds of 20 to 40 mph with gusts to 60 mph will surface across the wind prone mountain and desert areas Sunday afternoon through Tuesday night. The snow level with both storms will be between 7,000 and 8,000 feet. Temperatures will be near normal through early next week, with mid 40s to mid 50s across the mountains and upper 50s and 60s in the valleys. Warming and drying will occur next Wednesday as a ridge of high pressure builds into the region from the Pacific.
